6. Once you are in configuration page there are 5 configuration which are compulsory which you need to set.

- **Days Add to Overnight Delivery Days:** Add more days to overnight delivery days e.g:- if overnight delivery days is 7 and if you have mention 10 then it will show 17 days to delivery.
- **Using Iframe:** Set to YES if you want to use it and NO if not
- **Enable Jewelry iframe cart:** Set to YES if you want to have cart functionality and NO if not
- **Site Base URL For Iframe :** Add URL where we will redirect once customer click Add to cart button on our iframe. For example if you mention <https://www.yourwebsiteurl.com/iframe.php> then we will redirect customer to this URL once they click add to cart. And you need to create add to cart concept on your website based on the platform or programming language of your website. Keep in mind that we will just send parameter to this page and you can get this parameter using GET method (a programming method).
- **Jewelry iframe markup:** Add Markup according to you needs. For example you mention 20 then the price displayed on iframe will have 20% markup on the original price from overnight price.
- **Enable Diamond iframe cart:** Set to YES if you want Diamond iframe
- **Site Base URL For Diamond:** Add your URL where we will redirect once customer click Add to cart button on our iframe For example if you mention <https://www.yourwebsiteurl.com/iframe.php> then we will redirect customer to this URL once they click add to cart. And you need to create add to cart concept on your website based on the platform or programming language of your website.
- **Diamond iframe markup:** Add Markup according to you needs. For example you mention 20 then the price displayed on iframe will have 20% markup on the original price from overnight price.

Note: Once above configuration is done follow below steps to get the iframe code to paste into your site.

7. You can also click “My Account” on top of the page to access the left navigation panel directly for all our B2B2C solutions

I-FRAME LINKS

General Setup

Overnight has created 11 "I-Frame solutions" that our retailers can use to easily and quickly "plug in" to their existing websites under any desired categories. For example, if a retailer installs the Overnight Engagement ring I-Frame and sets the link to appear under their web-site as Engagement Rings, then any consumer that clicked on "Engagement Rings" on your Website would instantly access all of Overnight engagement ring styles - without ever leaving the retailer's site! [Click here](#) to go to our sample site, then click Engagement Ring to see how our I-Frame function within a website.

All subcategories within engagement rings would appear as options and when specific items were selected, the consumer would be able to view accurate, daily triple-key pricing, in multiple metals and diamond qualities. Once a consumer chooses an item in a desired metal and diamond quality - the retail jeweler would have full control of when and if to place that order with Overnight.

Click on i-frame links solution
I-FRAME IS DESIGNED FOR THOSE COMPANIES WHO HAVE WEB DEVELOPER OR IT PERSON WITH SOME PROFESSIONAL WEB DEVELOPING EXPERIENCE.

[CLICK HERE FOR THE SETUP GUIDE](#)

Please follow this 3 step process to install any or all of these I-Frame solutions into your website:

Step 1) Create an I-Frame tag on an empty page within your existing website;

Step 2) Copy the below any one url into the I-Frame <src> attribute;

iframe code shown below, url link in red; copy & paste code and replace R999999 with your customer ID

```
<iframe id="ifrm" style="width: 100%; height: 1800px; border: none;" src="https://iframes.overnight.com/engagement-rings/halo/round?customerid=R999999" scrolling="no" width="320" height="240"></iframe> <script type="text/javascript" src="https://cdnjs.cloudflare.com/ajax/libs/iframe-resizer/4.2.10/iframeResizer.js"></script> <script type="text/javascript"> //  jQuery(iframe#ifrm).on("load",function () { jQuery(iframe#ifrm).IFrameResizer( { checkOrigin: false, log: true, enablePublicMethods: true, heightCalculationMethod: 'max' }); }); // ]]&gt;&lt;/script&gt;</pre><p>or click <a href="#">GENERATE CODE</a> on each link to generate the code for immediate copying &amp; pasting.</p><p>Step 3) Set a navigation link on your website into the IFrame page.</p><p>Happy to help! +</p></div><div data-bbox="487 912 507 933" data-label="Page-Footer"><p>5</p></div>
```

8. Click on the “Web Solutions” link in the main navigation section.

The screenshot shows the OverNIGHT website's main navigation bar. The 'WEB SOLUTIONS' link is highlighted with a red box. A red arrow points from this link to a red box containing the text 'Click here for all options'. The website header includes links for Logout, My Account, Checkout, View Cart (12) for \$8,287.98, and a phone number (888) 731-1111. A search bar is also present. Below the navigation bar, a large banner for 'Lab Grown DIAMONDS' is displayed. The banner features a list of bullet points: '1,000's of certified center stones in all shapes & sizes', 'Melee from 1mm and up in VS2-SI1, F-G', 'Instock and available for next day delivery', and 'Order Loose or Set into any of our mountings'. It also mentions 'Free shipping on all Lab Grown Orders thru 12-31-19!' and '10 DAY MEMO ON ALL LAB GROWN DIAMONDS'. The banner includes logos for the International Gemological Institute (IGI) and GCAL. To the right of the text, there is an image of various lab-grown diamonds and a pair of tweezers. A circular badge on the right side of the banner says 'NO RISK! FREE SHIPPING 10 DAY MEMO'. A black button at the bottom right of the banner says 'VIEW TODAY'S INVENTORY'.

ENGAGEMENT RINGS WEDDING BANDS FASHION RINGS BRACELETS PENDANTS NECKLACES EARRINGS COUTURE COLLECTIONS DIAMONDS

I-FRAME SOLUTION

For customers with web developer or IT person with some professional web developing experience, Overnight has created jewelry and diamond iframes that our retailers can use to easily and quickly "plug in" to their existing website under any desired categories. Products will appear as "Frame" within our customer's existing web site. Basically, retailers insert a iframe link such as "Engagement Rings" on their website, when any consumer that clicked on Engagement Rings on your websites, an i-frame will link all of our engagement rings as well as its subcategories instantly to customer's website, giving the consumers ability to access all of our products while staying on the retailers website. Dynamic pricing is available for all the items with this solution. Retailers can set their own markups & seamlessly integrate iframe's add to cart with their own shopping cart. Consumers can change metal, color, diamond quality or size and have it price out instantly at current metal markets. Retailers would have full control of when and if to place that order with Overnight. Click here to go our sample site, then click engagement ring to see how our iframe function within a website.

Click on start now button

CUSTOM & PRESET CATEGORY DOWNLOADS

This option for the customers who already have an established website and would like to download images and breakdowns for their existing site. Our customers have the ability to grab preset categories instantly or customize your download by choosing any category or sub categories that may suit your specific needs. This option requires some technical support on your end to upload all of the info and image to your site. This option provides a self-contained package zip file that consists of an excel data spreadsheet, as well as images of your selected category, you can unzip all files to your computer; the excel file can be saved as universal "csv" file for further integration with whatever technology the customer is using. Download products files will be saved under "My Account - Present Category & Your Downloads" for archiving purposes.

11. Jewelry Iframe

Once you are done with the iframe links below are the details of the Parameters you will get. With the help of GET method (programming method) you will get below Parameters on the URL or Page which you have specified in **Site Base URL For Iframe** on point 6 and with the help of this parameter you need to create the add to cart concept based on your website platform or the programming language you are using for your website. So when customer click add to cart button from the iframe we will direct customer to the page or the URL you have mention in **Site Base URL For Iframe** under your account. Keep in mind that we are just providing details of the item with pricing and you need to create add to cart or adding item to cart concept based on your website platform or programming language of your website.

- stylenumber
- itemname
- imagevalue (its image url to get image of item)
- level
- metaltype
- metalcolor
- quality
- sizevalue
- fingersize
- finalpricing

Note: Please use exact words to get parameters values. Given below is sample how you get parameters for php programming language

- ✓ `$stylenumber = $_GET['stylenumber'];`
- ✓ `$level = $_GET['level'];`
- ✓ `$quality = $_GET['quality'];`

12 .Lab Grown Certified Diamond

If you are using Diamond iframe then below is the way to get the diamond information

You will get two parameters when customer click on add to cart in diamond iframe page and keep in mind we will redirect to the url which is specified in **Site Base url For Diamond**

- lotNumber
- customerID

Once you get above parameter use API call with below parameters

- custid = customerID (this should be same as Above ID)
- lotnumber = lotNumber (this should be same as Above lot number)
- type = xml
- action=diamonddata
- Below is the URL for API call.
